

Hi!

My name is Kevin David Badwi and I'm a blockchain developer student. I'm currently studying at Medieinstitutet, Stockholm, Sweden. I Previously graduated with a science degree from Klara Norra highschool and has after that studied business economics for three semesters at Royal institute of technology. I did all of this to develop as a person and to get my foot into the labor market. In the future I want to travel and see the world. I also want to experience different cultures and meet new people.

As a person I am easy going. I have high social skill and an ease to establish a network and collaborate. I have a great interest in the crypto space and I always try to keep my skills on par with the latest trends and technologies.

For me it's important to initiate and complete what I have started. It's also very important for me to always work based on the employer's requirements, instructions and existing routines.

In my free time, I like to spend time gaming, broadening my portfolio and understandment of crypto and NFTs and being with my family and friends. I practice soccer a few times a week to maintain good health both physically and mentally. By playing soccer all my life I learned at a young age to work together and achieve group goals which I also find fulfilling.

I have Swedish as my mother tongue, which I can speak and write well. I also speak English fluently and have good knowledge of French.

I look forward to hearing from you and that we can have a meeting for a personal interview.

With kind regards!

Kevin David Badwi
